April 18, 2018

I am a researcher in Veterans health, working at the VA Palo Alto HCS and serving as a Clinical Professor (affiliated) at Stanford University.

I have interacted with Dr. Nagy on several environmental issues. She is excellent at explaining the utility of environmental medicine treatment succinctly. She has presented to the Congressional Veterans' Health Subcommittee and was extremely convincing regarding the need to bring Environmental Medicine to the VA, and to develop environment-based approaches to prevent suicides in Veterans.

Dr. Nagy's passion is infectious and with support I am sure she will be successful in her endeavor to help many individuals whose illnesses have been contributed to by environmental toxins.

I look forward to working with her in years to come. I see that director of NIEHS Linda Birnbaum PhD is another supporter of Dr Nagy 's work and I too am recommending that she work closely with the VA.

I am suggesting that Dr. Nagy speak at a future VA meeting on environmental health in Veterans and look forward to her insights in years to come.
